

ALL ABOUT LEED & SUSTAINABILITY IN LESS THAN 3 HOURS

Exclusively for C Level Executives

This principle of this course is based on 'Sustainability for Economic Success,' addressing **Building Design, Construction, Operations and Maintenance Solutions**. Good Engineering is the pathway to achieve success in overall building performance, return on investment, energy efficiency and water conservation. This also paves way for sustainable purchasing practices and Greenhouse gas (GHG) emission reduction.

OBJECTIVES

- ESTABLISH** the objectives of the company's environmental responsibilities
- INCREASE** efficiency – Reduce Waste and Improve Processes
- IDENTIFY** metrics associated with same
- CREATE** a continuous development and monitoring program

WHO SHOULD ATTEND

CEOs • Directors • General Manager • Department Heads • C-level Officers

Those new or who have already heard of the basic concepts of Sustainability ---- Who are keen to learn more ---- and fast track their knowledge to implementation best practices
